Editorial Office

kmae@edpsciences.org

ISI indexation

KMAE is indexed in SciSearch and JCR/Science Edition («Marine & Freshwater Biology» and «Fisheries» sections) so giving your articles more influence on the freshwater ecosystem area.

Free archives

All articles are accessible free of charge dating back to 1928.

KMAE website

Visit www.kmae-journal.org, a clear and easy to use website, where you will find all the KMAE articles in PDF format, and a full-text semantic search engine.

Article submission

Using KMAE's Editorial Manager submitting and tracking of your manuscript is simple :
<http://www.editorialmanager.com/kmae/>

ONEMA who supports this high-level scientific journal, does so with the intention of helping to improve the status of scientific research carried out in this field by the scientific community. This scientific publication will complete the technical information available regarding: training, expertise assistance and management advice for many varied groups of people.

EDP Open is a platform providing global outreach of freely accessible content managed by EDP Sciences, a society-based professional publisher formed to serve the scientific community. EDP as developed an expertise recognised internationally for processing and dissemination of scientific information.

KMAE publishes articles, short communications, reviews, comments and replies that contribute to a scientific understanding of freshwater ecosystems and the impact of human activities upon these systems.

An international readership

KMAE is read around the world. Your article will reach researchers on every continent, thus giving it wide visibility and impact on the international scientific community.

KMAE's aims and scope

The journal serves as a foundation for scientific advice across the broad spectrum of management and conservation issues related to freshwater ecosystems.

Its scope includes economic, social, and public administration studies, in so far as they are directly concerned with the management of freshwater ecosystems (e.g. European Water Framework Directive, USA Clean Water Act, Canadian Water Quality Guidelines, ...) and prove of general interest to freshwater specialists. Papers on insular freshwater ecosystems and on transitional waters or estuaries are welcome.

KMAE is not a preferred journal for taxonomical, physiological, biological, toxicological studies, unless a clear link to ecological aspects can be established. Articles with a very descriptive content can be accepted if they are part of a broader ecological context.

Subjects covered:

1. Structure and dynamics of aquatic ecosystems (hydrobiology, aquatic ecology, trophic food webs, hydromorphology, river continuity, migrations and invasions);
2. impacts and adaptations to global changes (Climate Change effects and biodiversity loss, conflicts between water uses, species repartition area evolution, dynamics of ecosystems, biological indicators for river monitoring, water quality and ecosystems damages, ecotoxicological impacts, ...);
3. socio-economical analysis of environmental benefits and impacts (economical analysis of natural resources and ecological services, sociology, stakeholders, governance);
4. bioconservation, ecosystems restoration and ecological engineering, fisheries management, and other related management topics, all constitute the key elements of eligible papers.

The examination of all manuscripts by the peers committee is rigorous and the answers are sent to the authors in the shortest possible time. As soon as they are accepted and formatted, the papers are published on line.

At least 10 good reasons for publishing in Knowledge and Management of Aquatic Ecosystems

Open Access

KMAE and **EDP Sciences** are in favour of broad and easy access to all published scientific information and will favour measures taken in this direction. **All papers are in free access.**

No page charge

Submitting and publishing your article is free of charge.

The highest scientific review standards

KMAE only selects high quality articles. Your manuscript is reviewed by international referees selected by the Scientific Committee before being accepted for publication.

Worldwide visibility

In 2012, your article is read in 180 countries.

Easy linking

Online services use relevant databases listing articles citing the selected article, those from same author or same subject.

Free archives

All articles are accessible free of charge including *Bulletin Français de la Pêche et de la Pisciculture* archives, dating back to 1928.

Alert services

KMAE offers you free registration for the e-mail alert services that send you an e-mail each time new articles are published online or cited. And with RSS Feeds, the latest online article titles in **KMAE** are delivered directly to your desktop.

Relevant indexing

KMAE is indexed in the major databases: BIOSIS Preview • Current Contents - Agriculture, Biology & Environmental Sciences • ISI Web of Sciences • Science Citation Index Expanded • Zoological Record.

Copyright policy

You are free to post your article on your own website or the site of your institute as soon as it is published provided the source is cited.

Flexibility

You have the opportunity to publish your article with all the figures in color free of charge in the online version and can also publish supplementary material (moving pictures, large tables, appendixes...) on **KMAE's** website.
